CATEGORY	4	3	2	1
Complexity of Design	Design is original and has some complexity to it (beyond a basic design)	Design requires some cutting out (e.g., rounding corners)	Design has little to no original thought.	Not done.
Extra Steps or parts	Project has one or more non-required parts (including a picture in picture frame) and extra non-required steps (such as routering).	Project has at least some extra non-required steps or parts.	Project has minimum requirement.	Not done.
Filing and Sanding	All edges are sanded smooth with no bumps or visible saw marks.	All edges are mostly sanded smooth with minimal bumps or visible saw marks.	Appears like little to no filing or sanding took place.	Not done.
Finish	Finish is neat and adds to project. No bare spots or drips and is smooth (clear coat). Project is either painted or stained.	Finish is somewhat neat and adds to project. No bare spots or drips and is mostly smooth (clear coat).	Little to no evidence of finish.	Not done.
Metal	Edges of brass are aligned, no visible solder (except seem), and is very smooth and shinny.	Meets all requirements mentioned but lacks one of items mentioned.	Little evidence of correct work and finish.	Not done.
Plastic	Part(s) are bent and drilled as directed. All edges appear completely smooth and rounded (no roughness). More than one plastic part made.	Part(s) are bent and drilled as directed. All edges appear completely smooth and rounded (no roughness).	Little evidence of correct work and finish.	Not done.
