|--|---|
| Jellyfish are creatures found in most bodies of salt water, from the tropical waters of the Caribbean Sea, to the cold, dark waters of the Arctic Ocean. | 13 27 |
| Jellyfish are unusual creatures. When seen in the water, it's hard to believe they are a species from this planet. They look like aliens hanging suspended in water with their luminous layers of tissue and flesh. They have long, curly tentacles and plastic like bubble tops that sway in the sea. | 40 54 67 78 |
| Although it's difficult to believe, jellyfish have no heart, blood, brain, or gills. You can see through their mostly hollow stomach cavities where their food is digested and dissolved. Jellyfish have no proper eyes or ears. In fact, it's possible to believe that jellyfish are just brainless blobs without the slightest spark of intelligence. Amazingly enough, despite their lack of sight and hearing, jellyfish can distinguish touch, temperature, light, and darkness. They also know the direction and pull of water currents. | 92 105 119 131 142 153 159 |
| Jellyfish come in an assortment of colors and shades. The jellyfish living in cooler waters are generally pale or milky white in color. Many of the jellyfish that live in warmer, tropical waters are often strikingly colored in shades of magenta, scarlet, yellow, and orange. | 172 187 200 204 |
| A jellyfish can be as tiny as a thimble, and some can grow to be as colossal as a satellite dish. Most jellyfish can maneuver feebly in the water; however, their poor swimming skills place them at the mercy and whimsy of ocean currents. | 222 235 248 |
| Some jellyfish ride the ocean currents alone, while other species travel in special groups called colonies. The man-of-war is an example of a highly adapted jellyfish that travels with a colony. The man-of-war serves a special function in its colony. It catches prey with a very long tentacle that can trail as far as one hundred feet through the sea. The man-of-war's prey includes shrimp, squid, and fish. It also produces potent venom that is harmful to humans who may swim nearby, unaware of the man-of-war's clever and stunning snares. | 260 275 291 308 323 336 346 |

Jellyfish are creatures found in most bodies of salt water, from the tropical waters of the Caribbean Sea, to the cold, dark waters of the Arctic Ocean.

Jellyfish are unusual creatures. When seen in the water, it's hard to believe they are a species from this planet. They look like aliens hanging suspended in water with their luminous layers of tissue and flesh. They have long, curly tentacles and plastic like bubble tops that sway in the sea.

Although it's difficult to believe, jellyfish have no heart, blood, brain, or gills. You can see through their mostly hollow stomach cavities where their food is digested and dissolved. Jellyfish have no proper eyes or ears. In fact, it's possible to believe that jellyfish are just brainless blobs without the slightest spark of intelligence. Amazingly enough, despite their lack of sight and hearing, jellyfish can distinguish touch, temperature, light, and darkness. They also know the direction and pull of water currents.

Jellyfish come in an assortment of colors and shades. The jellyfish living in cooler waters are generally pale or milky white in color. Many of the jellyfish that live in warmer, tropical waters are often strikingly colored in shades of magenta, scarlet, yellow, and orange.

A jellyfish can be as tiny as a thimble, and some can grow to be as colossal as a satellite dish. Most jellyfish can maneuver feebly in the water; however, their poor swimming skills place them at the mercy and whimsy of ocean currents.

Some jellyfish ride the ocean currents alone, while other species travel in special groups called colonies. The man-of-war is an example of a highly adapted jellyfish that travels with a colony. The man-of-war serves a special function in its colony. It catches prey with a very long tentacle that can trail as far as one hundred feet through the sea. The man-of-war's prey includes shrimp, squid, and fish. It also produces potent venom that is harmful to humans who may swim nearby, unaware of the man-of-war's clever and stunning snares.
