

Lebanon Valley College

ACTUARIAL SCIENCE SUMMER SCHOLARS PROGRAM

Actuaries are business professionals who use mathematical and financial tools to identify and manage risk. They are hired by insurance companies, banks, consulting firms, healthcare organizations, governments, and more. **They enjoy high pay, high job security, and great work-life balance.**

LVC'S ACTUARIAL SCIENCE SUMMER SCHOLARS PROGRAM

is a **one-week residential program** for high school students between their junior and senior year.

During the week, students will

- learn what it takes to launch a successful actuarial career,
- engage in hands-on actuarial projects,
- network with industry professionals, and
- interact with LVC faculty—with years of actuarial teaching experience—and current LVC students who are currently seeking credentials.

CAMP DATES

There will be two actuarial science summer camps in 2018:

June 24–29
— OR —
July 8–13

During the week, students live on campus with other students who are interested in actuarial science. They stay in LVC's residence halls, eat on campus, and are supervised at all times by current LVC Resident Assistants.

PRICING

The camp fee is \$900, and it covers all camp-related expenses including room, board, and access to campus facilities. Financial aid may be available, especially for African American, Native American, and Hispanic students. Please see the camp website for more details.

APPLICATION

Applications will be accepted until **April 15**. To apply, please visit www.lvc.edu/summer-scholars-actuarial-science.

ABOUT LVC'S ACTUARIAL SCIENCE PROGRAM

During the past four decades, LVC has launched 84 Fellows and 52 Associates of the actuarial societies and more than two dozen enrolled actuaries. LVC actuarial science graduates enjoy a nearly **100 percent job offer rate** by the time they graduate. Numerous companies recruit on campus for summer and full-time jobs.

LVC actuarial graduates are **employed by more than 100 firms**, including Chubb/ACE, Aetna, Voya Financial, The Hartford, Mercer, Towers Watson, Highmark, and many more.

For our students, professional success naturally follows from student achievement. We require students to pass at least one actuarial credential exam before graduating. In the last three years, students passed an average of 2.6 exams before graduating.

Our students' success stems from our emphasis on the learning process. Our students learn to extract technical information, master it, and then explain it. Employers seek our graduates because they are articulate and technically proficient, a rare combination.
