

Meeting the needs of TOMORROW'S WORKFORCE!

Health Occupations Program Expansion

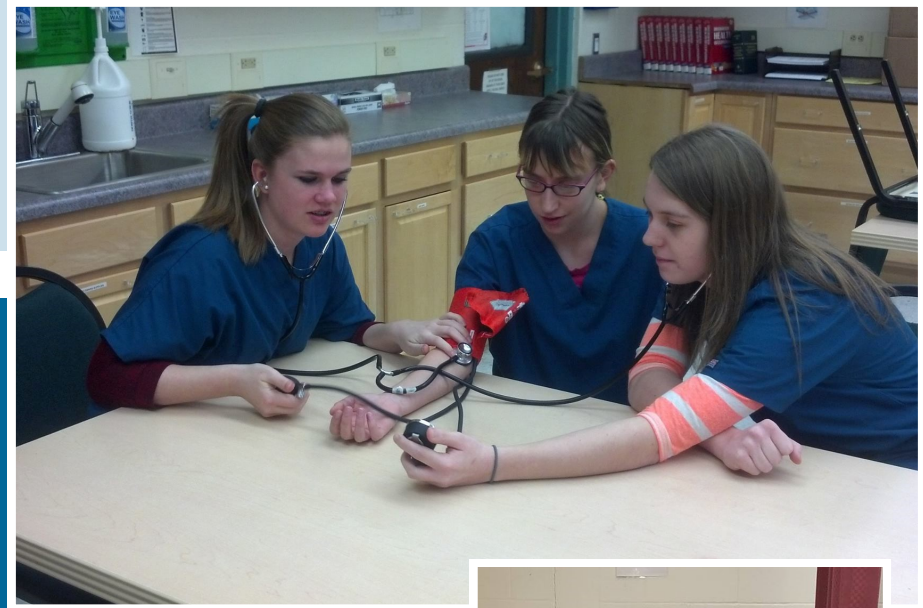

The Healthcare industry is the second largest private employment sector in Cumberland County and the largest in Pennsylvania¹. The Cumberland Area Economic Development Corporation has prioritized workforce development in Healthcare as a vital component to meet current and future employment demands. Healthcare Support is forecast to be the fastest growing occupational area in Cumberland County through 2022 and beyond².

CUMBERLAND PERRY AVTS provides students a pathway into many areas within the Healthcare Industry through the Nurse Assisting program.

CURRENT CPAVTS CURRICULUM SEQUENCE

Program expansion will increase capacity in the number of students and also in the curriculum available to students. By making additional curriculum available to students, the program will allow a transition from a Nurse Assisting focus towards a more personalized "Health Occupations" focus, allowing students more options in their curriculum choices. The renovated space is designed to be flexible in use, allowing for changes in curriculum responsive to changes in industry demand.
