

Hear Me Out

Spring Newsletter

Jennifer Kelly, DHH Teacher

This is a great opportunity to celebrate and learn more about American Sign Language.

On this day in 1817, the American School for the Deaf (ASD) opened in Hartford, Connecticut. There, teachers and students worked together, and by intermingling Native American Signs, French Sign Language, and even Martha's Vineyard Sign Language, American Sign Language (ASL) was born.

Tips to Protect Your Hearing

Turn it down!

Be aware of the volume of your music, iPod, etc. If others can hear through your headphones, the volume is too loud.

Wear hearing protection!

Loud activities such as mowing, using power tools, and indoor sporting events can permanently damage your inner hair cells, causing hearing loss.
