Write To Me Journal

Directions for Parent/Guardian:

Make writing real and fun by engaging in everyday writing with your student!

Below you will find five writing prompts for parent/ guardians and students to practice with. This activity will focus on improving students' writing ability by incorporating it into everyday life. To complete this activity, give your student the writing journal and have them answer the first question in the designated spot. A day or two later, take back the journal and answer the parent portion of the journal question. In your response, make sure to address your student's response and also answer the question for yourself. This process will continue for about 2 weeks until the prompts are answered. This activity may continue with personalized prompts that are suited for your family!
